PRODUCT INFORMATION

Worksite Lighting Explosion Proof Extension Handlamp: A Versatile, High-Performance Solution for Demanding Environments

The Worksite Lighting Explosion Proof Handlamp delivers reliable, high-intensity illumination for hazardous, potentially explosive environments. Available in both 120-volt and 12-volt variants and equipped with an explosion-proof plug, this handlamp is expertly designed for both safety and performance.

EXPLOSION PROOF:

Safeguards against vapor interference to deliver safe, effective lighting in hazardous location environments where ignitable gases may be found.

OSHA COMPLIANT:

Explicitly fulfills the OSHA standards for confined space lighting for increased workplace safety.

SAFE

Explosion proof lighting offers substantial safety advantages in hazardous environments, preventing ignitions caused by flammable vapors or gases. By being sealed against moisture and airborne particles, these lights ensure reliable performance while mitigating risks. This safety-focused design enhances the security of workspaces that frequently encounter challenging conditions.
