1G12RH

Rotating Head LED Flashlight

EDC BY KBS

OPERATING INSTRUCTIONS

Thank you for purchasing the Bright Star 1G12RH Rotating Head LED Flashlight!

STOP

Read all warnings and instructions thoroughly before first use

Unscrew tail cap and remove battery insulator before first use

Operating Instructions

Proper care of your new light is essential to get a long dependable life of service. Please take some time to review this instruction sheet before using your new flashlight.

The flashlight comes with a rechargeable Li-Ion battery. The Li-Ion battery provides up to 4 hours of continuous runtime with a 4-hour charge.

CHARGING INSTRUCTIONS:

The rechargeable battery inside the 1G12RH Rotating Head LED Flashlight is designed to be charged inside the flashlight. Removing the Li-Ion battery from the light is not necessary. Simply insert a USB-C cable into the designated charge port.

Once the flashlight is plugged in, the charge indicator in the center of the power switch button will turn RED, indicating the unit is charging. In order to get the longest runtime out of your 1G12GH Right Angle LED Flashlight, leave the flashlight on the charger until the charging indicator turns GREEN.

MODE SWITCH INSTRUCTIONS:

1st Press: ON/HIGH
2nd Press: MED
3rd Press: LOW
4th Press: STROBE
5th Press: SOS
6th Press: OFF

Safety:

- Flashlight will generate heat while working.
- Do not clean the flashlight with harsh chemicals, use only mild detergent and water.
- Do not dispose of the Li-Ion battery pack in fire, the battery may cause serious injuries
- Please refer to local ordinances regarding Li-Ion battery disposal
- Use of this product for any other purpose than a flashlight is prohibited.

Warranty: This product is subject to a 1-year warranty from date of purchase for any manufacturing defects. Proof of purchase may be required.
