

# Vapor Proof Inline Handlamp

DWVP-IL

## PRODUCT INFORMATION

### Worksite Lighting Vapor Proof Extension Handlamp: A Versatile, High-Performance Solution for Demanding Environments

The Worksite Lighting Vapor Proof Extension Handlamp is a cautiously crafted lighting solution for strenuous applications demanding vapor-proof utilities. This handlamp ensures dependable, sustained, OSHA-compliant illumination for confined spaces, available in both 24-volt and 12-volt versions. It promises reliable performance across diverse challenging operational environments.

#### VAPOR PROOF:

Safeguards against vapor interference to deliver safe, effective lighting in wet and damp environments where it is typically found.

#### OSHA COMPLIANT:

Explicitly fulfills the OSHA standards for confined space lighting for increased workplace safety.

#### SAFE

Vapor proof lighting offers substantial safety advantages in hazardous environments, preventing ignitions caused by flammable vapors or gases. By being sealed against moisture and airborne particles, these lights ensure reliable performance while mitigating risks. This safety-focused design enhances the security of workspaces that frequently encounter challenging conditions.
