Intrinsic Safety	   ,       -	Division 1 Division 1 Zone 0 Zone 20	-	ISA/UL/CSA C22.2 No.60079-11 UL 913, CSA C22.2 No. 157	Limit energy of sparks and surface temperature		

Note 1: In the United States, suitability for equipment in mining applications is per approval by the Mine Safety and Health Administration (MSHA). Intertek can test and evaluate equipment to Alternative Case Resolution Initiative (ACRI) standards or equivalent, per US National Standards, providing test reports for your submittal to MSHA.

Note 2: For US Zone Ex Scheme: Zone 0, 1 and 2 "Ex" markings are preceded by "Class I," and "Ex" is preceded by "A." Note 3: For associated intrinsically safe apparatus suitable for installation in a hazardous location, the symbol for the type of protection ("ia" or "ib") is enclosed within square brackets on the marking, e.g., "AEx d [ia] IIC T4." For intrinsically safe apparatus not suitable for installation in a hazardous location, both the symbol "Ex" or "AEx," and the symbol for the type of protection, "ia" or "ib," are enclosed within the same square brackets on the marking, e.g., [AEx ia] IIC; in this case, a temperature class is not included. Note 4: Protection type "vc" is not recognized by the NEC

\* Product standard has removed this type of protection, however, equipment already approved for this protection method is still recognised by the NEC & CEC. † NOTE Intertek has the Custom Panel Builders Program for Hazardous Locations Panels to address these standards.

Additionally panels providing intrinsically safe outputs are also included.

Enclosure	Туре	Ratings	[NEC	&	CEC]
	- <b>3</b> P -				

Туре	Area	Brief Definition
1	Indoor	General purpose
2	Indoor	Protection against angled dripping water
3, 3S	Indoor / Outdoor	Protection against rain, sleet, dirt, snow and windblown dust
3R	Indoor / Outdoor	Protection against rain, sleet, dirt and snow
4, 4X	Indoor / Outdoor	Protection against rain, snow, hose directed water and corrosion
5	Indoor	Protection against rangled dripping water, dust, fibers, flyings
6	Indoor / Outdoor	Protection against temporary submersion
6P	Indoor / Outdoor	Protection against prolonged submersion
12, 12K	Indoor	Protection against circulating dust, fibers, flyings
13	Indoor	Protection against circulating dust, fibers, flyings, seepage

## **ABOUT INTERTEK**

TOTAL QUALITY. ASSURED. Intertek is a leading Total Quality Assurance provider to industries worldwide. Our network of more than 1,000 laboratories and offices in more than 100 countries, delivers innovative and bespoke Assurance, Testing, Inspection and Certification solutions for our customers' operations and supply chains. Intertek Total Quality Assurance expertise, delivered consistently with precision, pace and passion, enabling our customers to power ahead safely.

# ATEX, IECEx and UKEx

### ATEX Directive 2014/34/EU

Intertek has the ability to issue ATEX Notified Body certificates, offering efficiency and speed to market for global manufacturers entering Europe and beyond. Contact Intertek for more information.

## **IECEx Scheme**

Manufacturers of Ex equipment can obtain certificates of conformity, accepted at a national level for all countries participating in the IECEx Scheme.

A certificate of conformity may be obtained from any certification body accepted into the Scheme. The certificate will attest (1) the equipment design conforms to relevant IEC Standards, and (2) the product is manufactured under a quality control program assessed and registered though a Quality Assessment Report (QAR) by an accredited IECEx Certification Body (ExCB).

Intertek has IECEx Testing Laboratories (ExTLs) across North America, Europe, and Asia, and is an IECEx Certification Body (ExCB). For more information visit www.IECEx.com.

### **UKEx - UK Statutory Instrument 2016 No.1107**

Intertek has the ability to issue UKEx and UKExNI Approved Body certificates, for global manufacturers entering the UK. UKEx requirements are currently closely aligned to ATEX requirements. Contact Intertek for more
