

# Low Voltage Portable Transformer

TF4-B

**WORKSITE**  
LIGHTING AND POWER SOLUTIONS

## PRODUCT INFORMATION

### Worksite Lighting Low Voltage Portable Power Distribution Unit

Introducing the Worksite Lighting Electric Portable Power Distribution Unit (PDU), your go-to solution for effective power management in various work environments. This unit features a dependable 120V to 12V step-down transformer, making it perfect for applications that require lower voltage distribution.

#### KEY FEATURES:

- **Voltage Conversion:** Efficiently converts 120V to 12V, ensuring safe power supply for sensitive low voltage equipment.
- **Robust Power Capacity:** Engineered to handle demanding loads while maintaining optimal performance.
- **Safety Compliance:** UL listed, providing peace of mind with adherence to strict safety and quality standards.
- **Twist-Lock Connections:** Equipped with four 9965-C twist-lock connections for secure and reliable power distribution.
- **Durable Design:** With a NEMA 3R rating, this unit is built to withstand both indoor and outdoor conditions, ensuring longevity in tough environments.

## SPECIFICATIONS
